# PPP 2.0 | PREDICTIVE PERFORMANCE PROGRAM

INDIVIDUALIZED INSIGHTS. REAL PERFORMANCE ADVANTAGE.

An individualized, data-driven system that learns ***what*** predicts performance for each person—and ***when***—so you can anticipate and optimize future performance.

## KEY ADVANTAGES

- Individualized (not one-size-fits-all)
- Accounts for personal timing
- Works with multiple data sources (including wearables)
- Actionable insights to improve future performance

### BUILT ON REAL-WORLD TESTING

Working prototype developed in Flutter (Android, iOS and Windows).
Real-world testing underway with multiple users to validate and refine predictive models.

### COMPLEMENTARY WEARABLE TECHNOLOGY

Issued patents for sensor-based wearable technology incorporating motion sensing and haptic feedback provide additional opportunities for data acquisition and real-time feedback. These technologies are independent but complementary to PPP 2.0.
